PROFESSIONAL SUMMARY

Senior Information Technology student with multi-disciplinary skills across Development, UI/UX Design, and Business, adept at applying holistic knowledge to create practical digital products. Experienced in end-to-end system development—from problem analysis and user experience design to full implementation and testing—delivering real-world solutions that align user needs with business goals.

EDUCATION

Bangkok University — Expected Graduation: May 2027
B.Sc. in Information Technology · Cumulative GPA: 3.50

SELECTED PROJECTS

Enterprise Inventory & Asset Management System — Senior Project · Thaicom Public Company Limited

- Designed comprehensive UX/UI and prototypes for an enterprise-scale system spanning **113+ screens**.
- Established a standardized UI design system for developers to ensure visual consistency and development speed.
- Developed a web application covering asset requisition, transfer, disposal, and executive-level reporting.

Technologies: PHP, Laravel, HTML/CSS, JavaScript, Oracle Database, Figma

Life & Business Hub — Personal Project · PWA

- Built a full-featured PWA with an AI assistant (Gemini 1.5 Pro API) accepting Thai voice input with multi-turn memory.
- Automated daily sales reports to LINE OA every morning at 9 AM; integrated Gmail OAuth2 & Firebase real-time sync.

Technologies: JavaScript, Firebase Realtime DB, Gemini 1.5 Pro API, LINE Notify API, Chart.js

POS & Cost/Profit Management System — Sem & Friends (Live Production)

- Built a bespoke Point-of-Sale and cost-tracking web application for a retail food business.
- Engineered automated dashboards reflecting real-time revenue, net profit, and best-selling metrics via Google Sheets API.
- Currently used in daily operations to optimize inventory ordering and financial tracking.

Technologies: Google Apps Script, Google Sheets API, HTML/CSS, JavaScript

Modern Web & AI Applications — Personal Projects

- Real-time dual-hand gesture drawing system (21 landmarks/hand) built with Python, OpenCV, and MediaPipe.
- Responsive e-commerce and food-ordering web applications with premium UI, micro-animations, and interactive checkout.

Technologies: Python, OpenCV, MediaPipe, HTML5, CSS3, Vanilla JS

WORK EXPERIENCE

Owner & Online Marketing Lead — 2024 – Present
Sem & Friends (Fried Mala) — Self-Employed

- Developed the **MALA POS** web app to streamline order processing, ingredient cost tracking, and sales analytics.
- Led online marketing via **LINE OA** with over **300+ followers**, driving promotional campaigns and online orders.

O2O Order Fulfillment Staff (Part-time) — 2023
Makro (CP Axtra)

- Fulfilled online orders and conducted inventory stock checks for store handoff during peak high-volume periods.

Data Entry Staff (Part-time) — 2023
Thailand International Motor Expo

- Entered vehicle specifications and managed visitor customer data accurately and on schedule during peak rush periods and long queues.
